New Business Degrees at RMIT University

RMIT is offering two *new* degrees to domestic students in 2022. They are –

- [Bachelor of Business](#)

With the new Bachelor of Business, you won't have to deal with traditional lectures or exams, instead you will focus on industry projects and real-world learning. To support your future in business, we have created an extensive range of career focused areas of study (Majors and Minors) allowing you to customise your degree and gain an edge.*

*Please note: if completing the Accounting/Professional Accounting Major, you will be required to sit an exam for accreditation purposes.

The *new* business degree provides flexibility. Students start their business education journey with four foundation subjects that will introduce them to the key issues currently facing industry, and supplement these with their choice of disciplinary and cross-disciplinary study. Students get to choose one or two **majors** out of a range of 15; and compliment this with a choice of 35 **minors**. Students can browse [Understanding your Majors](#) to learn more about these offerings.

The VCE prerequisite for entry is Units 3 and 4: a study score of at least 30 in English (EAL) or at least 25 in English other than EAL.

- [Bachelor of Business Professional Practice](#)

The *new Bachelor of Business Professional Practice* gives students access to all of the options in the (3-year) Bachelor of Business with the added benefit of a dedicated minor (in Study and Work) and professional experiences with industry partners, research centres, start-up support networks and/or the not-for-profit sector, depending on their choices. Students will start their professional experience with RMIT's award-winning virtual internship, which includes direct industry contacts and students solving industry challenges as consultants. Students will then have the option to choose a range of professional experiences alongside their major/minor studies as they explore their own experiential learning journey.

As with the Bachelor of Business, students get to choose one or two **majors** out of a range of 15; and compliment this with a choice of 35 **minors**. Students can browse [Understanding your Majors](#) to learn more about these offerings.

What is a Barrister?

A barrister is a lawyer with specialist skills in representing clients in court or in a negotiation and advising on court processes. Many barristers are specialists in particular areas of law, such as criminal law, corporations' law, property law or personal injury.

Any lawyer can become a barrister. *Becoming a barrister is about your skills and abilities, not what school you went to or what ATAR you got. The Bar has diverse membership from many ethnic backgrounds. You can come to the Bar at any age – the youngest barristers are in their 20s and the oldest are in their 80s.* The Bar is short for the Victorian Bar which is the professional association representing over 2000 barristers in Victoria.

So, how are barristers and solicitors different? Barristers and solicitors are types of lawyers. Solicitors are generally the first lawyer that a client will see to explain their legal problem. Not all legal issues end up in court – for example, drafting a contract or a Will, or looking after buying and selling a house – so not all legal issues require the expertise of a barrister.

Nexus Program

A revolutionary path into secondary teaching - the Nexus Program provides a first of its kind pathway into secondary teaching. Nexus students will be supported by the Federal Government's [High Achieving Teachers Program](#). This means successful participants **will receive a small part-time salary while studying**, as well as access to mentoring and professional development.

What are the benefits of Nexus?

Nexus aims to recruit, prepare, graduate, and assist in the employment of teachers in low socioeconomic schools in urban, regional, and rural Victoria. Nexus students will receive all the benefits of the [Master of Teaching \(Secondary\)](#) plus:

- payment at teacher aide rates as they become a fully qualified secondary teacher
- placement in a low socioeconomic secondary school in regional or metropolitan Victoria throughout their degree
- extra opportunities for professional development in social justice areas
- employment support at graduation and for two years as a beginning teacher
- a blend of block study during intensives and highly mentored external study
- Nexus students will spend more time with lecturers, teachers and local communities
- all Nexus places are Commonwealth supported

Current VCE students considering a career in secondary education are highly recommended to learn more about this excellent opportunity - [La Trobe Nexus Program](#)

VICTORIAN CURRICULUM AND ASSESSMENT AUTHORITY

What is VET in the VCE?

VET stands for *Vocational Education and Training*, and vocation refers to work or employment. **VET in the VCE** programs are designed to give students an exposure to practical skills and an understanding of what it is like to 'learn through doing'. So, students can opt to do a VET subject while completing their VCE and, in most cases, the VET qualification contributes towards the VCE and the ATAR.

Visit [Get VET in the VCE](#).

CASPer Entry Requirements for Teacher Qualifications

CASPer is an online test designed to assess an applicant's personal and professional attributes. **CASPer** is a requirement of applying to many initial teaching training courses in Victoria - [CASPer](#)

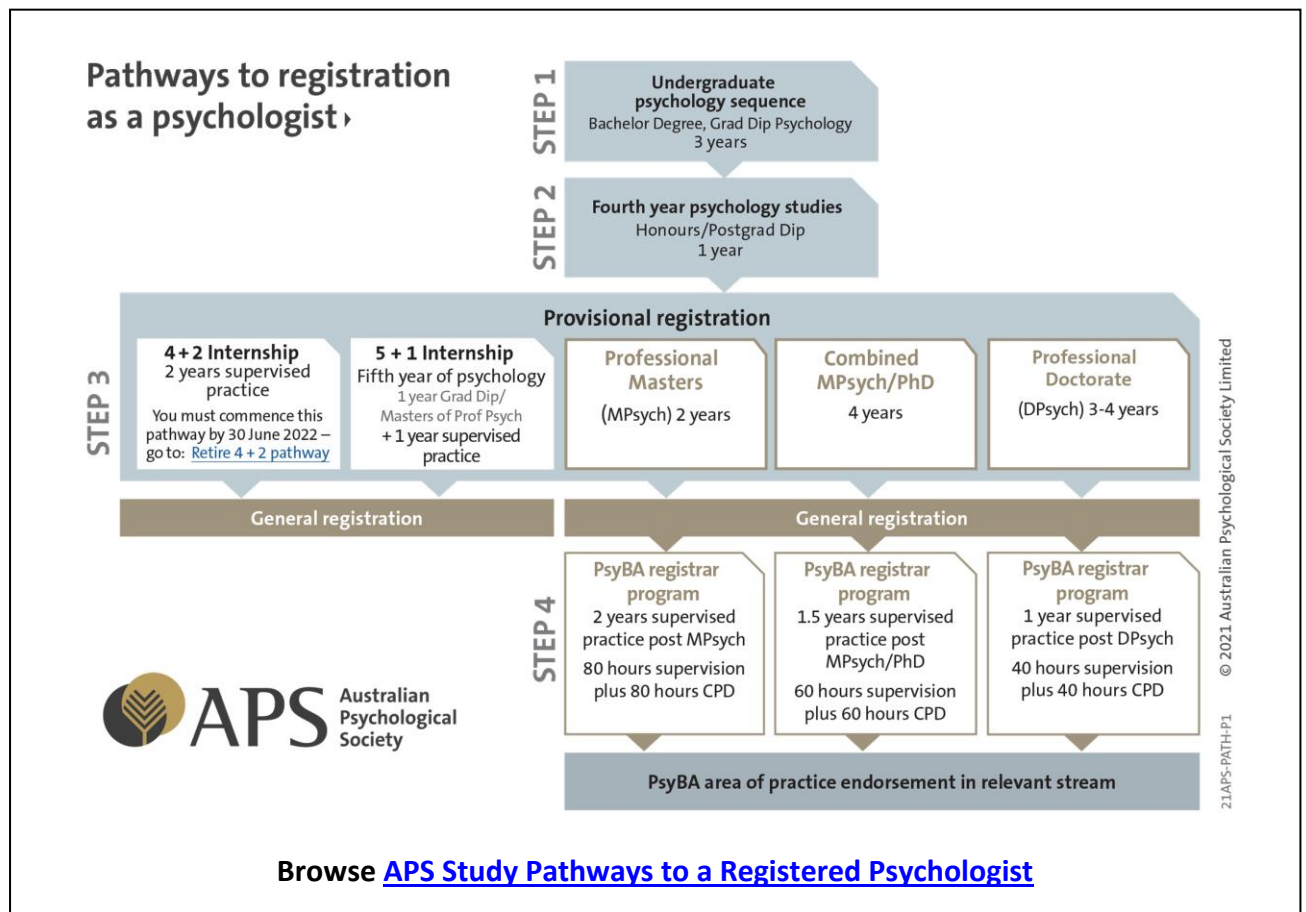

Most universities offering undergraduate teaching courses will be requiring students sit the **CASPer** online test as part of the selection into teaching degrees in 2022. Students are encouraged to browse [VTAC](#) and learn which courses will require the **CASPer** for selection. Students might also like to browse [CASPer – how it works](#) and have a look at some [sample scenarios](#) too.

Electrical Engineering Degrees in Victoria in 2021

Electrical engineers design, develop and supervise the manufacture, installation, operation and maintenance of electrical systems. They work on systems for the generation, distribution, utilisation and control of electric power. They also work on electronic systems used for computing, communications and other industrial applications. (Good Universities Guide)

Electrical Engineering involves the design and study of electronics, power, and electrical systems. Electrical Engineering deals with the problems associated with large-scale electrical systems such as power transmission and motor control.
